Name: ______________________ Date: ______________________

MOTION AND TIME

Solve the following problems. Write your answer on the line. Score: ______ / 20

Grade 7 | Science | Sheet 2

1) Distance-time graph slope = ___.

2) Uniform motion has constant ___.

3) Non-uniform motion has changing ___.

4) A spring balance measures ___.

5) A beam balance measures ___.

6) Magnetic force is a ___ force.

7) Electrostatic force is a ___ force.

8) Friction can be reduced by ___.

9) Terminal velocity is reached when drag equals ___.

10) Work = force x ___.

11) Power = work / ___.

12) SI unit of energy is ___.

13) Kinetic energy is energy of ___.

14) Potential energy is energy of ___.

15) KE = 0.5 x mass x ___.

16) Conservation of energy: energy car

17) Momentum = mass x ___.

18) Impulse = force x ___.

19) Rolling friction is ___ than sliding friction.

20) Drag is friction in ___.

ANSWER KEY

Motion and Time -- Solutions

Grade 7 | Science | Sheet 2

1) Distance-time graph slope = ___. **speed**	**2)** Uniform motion has constant ___. **speed/velocity**	**3)** Non-uniform motion has changing ___. **speed**	**4)** A spring balance measures ___. **weight**
5) A beam balance measures ___. **mass**	**6)** Magnetic force is a ___ force. **non-contact**	**7)** Electrostatic force is a ___ force. **non-contact**	**8)** Friction can be reduced by ___. **lubrication**
9) Terminal velocity is reached when drag equals ___. **weight**	**10)** Work = force x ___. **distance**	**11)** Power = work / ___. **time**	**12)** SI unit of energy is ___. **Joule**
13) Kinetic energy is energy of ___. **motion**	**14)** Potential energy is energy of ___. **position**	**15)** KE = 0.5 x mass x ___. **velocity squared**	**16)** Conservation of energy: energy cann **created**
17) Momentum = mass x ___. **velocity**	**18)** Impulse = force x ___. **time**	**19)** Rolling friction is ___ than sliding friction. **less**	**20)** Drag is friction in ___. **fluids/air/water**
