

Name: _____ Class/Sec: _____ Roll No: _____ Date: _____

SOUND

Write your answer on the blank line provided.

Score: _____ / 20

Sheet 4/4

1 Sound is a ____ wave.

Ans: _____

3 Wavelength is distance between two ____.

Ans: _____

5 High frequency sound has ____ pitch.

Ans: _____

7 Bats use ____ for navigation.

Ans: _____

9 Decibel (dB) scale is ____ (geometric/linear).

Ans: _____

11 Sonar uses ____ to detect underwater objects.

Ans: _____

13 Noise pollution can damage ____.

Ans: _____

15 Resonance occurs when vibrations match ____ frequency.

Ans: _____

17 Echo is ____ of sound.

Ans: _____

19 Sound cannot travel through ____.

Ans: _____

2 Loudness depends on ____.

Ans: _____

4 Compressions and rarefactions are in ____ waves.

Ans: _____

6 Pitch depends on ____.

Ans: _____

8 Loudness is measured in ____.

Ans: _____

10 Amplitude determines ____ of sound.

Ans: _____

12 Musical instruments use ____ to produce sound.

Ans: _____

14 Sound energy can be converted to ____ energy.

Ans: _____

16 Ultrasound has frequency above ____ Hz.

Ans: _____

18 Infrasound has frequency below ____ Hz.

Ans: _____

20 Reverberation is prolonged ____.

Ans: _____

ANSWER KEY

Sound

1 Sound is a ____ wave. Ans: longitudinal	2 Loudness depends on ____. Ans: amplitude	3 Wavelength is distance between ____. Ans: compressions/rarefactions	4 Compressions and rarefactions travel ____. Ans: longitudinal
5 High frequency sound has ____ wavelength. Ans: high	6 Pitch depends on ____. Ans: frequency	7 Bats use ____ for navigation. Ans: echolocation	8 Loudness is measured in ____. Ans: decibels
9 Decibel (dB) scale is ____ (geometric). Ans: logarithmic	10 Amplitude determines ____ of sound. Ans: loudness	11 Sonar uses ____ to detect underwater objects. Ans: ultrasound	12 Musical instruments use ____ to produce sound. Ans: vibrations
13 Noise pollution can damage ____. Ans: hearing/ears	14 Sound energy can be converted into ____ energy. Ans: electrical	15 Resonance occurs when vibrations are ____. Ans: natural	16 Ultrasound has frequency above ____ Hz. Ans: 20,000
17 Echo is ____ of sound. Ans: reflection	18 Infrasound has frequency below ____ Hz. Ans: 20	19 Sound cannot travel through ____. Ans: vacuum	20 Reverberation is prolonged ____ in a large hall. Ans: sound/echo
