

Candidate Name: _____ Interviewer: _____ Date: _____ Score: _____

TOP 10 C++ INTERVIEW QUESTIONS

Core mechanisms, architecture, production configs & identity integration

PART 1: QUESTIONS 1 - 5

Q1

What are the core design goals and primary use cases for C++?

Fundamentals

Answer:

Q2

Explain the type system in C++: static vs dynamic typing, type inference, and type safety.

Architecture

Answer:

Q3

How does C++ handle memory management: manual, garbage collection, or reference counting?

Configuration

Answer:

Q4

Describe the concurrency model in C++: threads, async/await, coroutines, or actors.

Security Ops

Answer:

Q5

What are the key data structures in C++'s standard library and when do you use each?

Integration

Answer:

Candidate Name: _____ Interviewer: _____ Date: _____ Score: _____

TOP 10 C++ INTERVIEW QUESTIONS

Credential lifecycle, audit, compliance, vulnerability testing & performance

PART 2: QUESTIONS 6 - 10

Q6

How does C++ implement object-oriented programming, functional programming, or both?

Key Mgmt

Answer:

Q7

Explain error handling in C++: exceptions, Result/Either types, or error codes.

Monitoring

Answer:

Q8

How does C++'s package/module system work and what is the standard build tool?

Compliance

Answer:

Q9

What are common performance optimization techniques specific to C++?

Pen-Testing

Answer:

Q10

How do you write unit tests and measure code coverage in a C++ project?

Performance

Answer:
