

Candidate Name: _____ Interviewer: _____ Date: _____ Score: _____

TOP 10 FUNCTION CALLING INTERVIEW QUESTIONS

Core mechanisms, architecture, production configs & identity integration

PART 1: QUESTIONS 1 - 5

Q1 What is Function Calling and what machine learning or AI problems is it designed to solve? Fundamentals

Answer: _____

Q2 Explain the core abstractions or APIs in Function Calling (models, tensors, pipelines, agents). Architecture

Answer: _____

Q3 How does Function Calling handle training: defining a model, specifying a loss, and running optimization? Configuration

Answer: _____

Q4 What is Function Calling's approach to data ingestion, preprocessing, and batching? Security Ops

Answer: _____

Q5 How do you evaluate model performance in Function Calling (metrics, validation sets, cross-validation)? Integration

Answer: _____

Candidate Name: _____ Interviewer: _____ Date: _____ Score: _____

TOP 10 FUNCTION CALLING INTERVIEW QUESTIONS

PART 2: QUESTIONS 6 - 10

Credential lifecycle, audit, compliance, vulnerability testing & performance

Q6 How does Function Calling support model deployment and serving in a production environment? Key Mgmt

Answer: _____

Q7 What hardware acceleration does Function Calling support (GPU, TPU) and how do you configure it? Monitoring

Answer: _____

Q8 How does Function Calling handle distributed or multi-GPU training? Compliance

Answer: _____

Q9 What are common debugging techniques for model training issues in Function Calling? Pen-Testing

Answer: _____

Q10 How do you version and experiment-track models in a Function Calling-based ML workflow? Performance

Answer: _____
