

Candidate Name: _____ Interviewer: _____ Date: _____ Score: _____

TOP 10 DISTRIBUTED DATABASES INTERVIEW QUESTIONS

Core mechanisms, architecture, production configs & identity integration

PART 1: QUESTIONS 1 - 5

Q1

What is Distributed Databases and what primary problem does it solve in the Distributed Systems space?

Fundamentals

Answer:

Q2

Explain the core architecture or components of Distributed Databases and how they work together.

Architecture

Answer:

Q3

What are the main alternatives to Distributed Databases and when would you choose it over them?

Configuration

Answer:

Q4

How do you install, configure, and get started with Distributed Databases for a new project?

Security Ops

Answer:

Q5

What are the key configuration options or settings that affect Distributed Databases's behavior in production?

Integration

Answer:

Candidate Name: _____ Interviewer: _____ Date: _____ Score: _____

TOP 10 DISTRIBUTED DATABASES INTERVIEW QUESTIONS

Credential lifecycle, audit, compliance, vulnerability testing & performance

PART 2: QUESTIONS 6 - 10

Q6 How does Distributed Databases handle scalability, reliability, and high availability? Key Mgmt

Answer:

Q7 What observability does Distributed Databases provide: metrics, logs, traces, or health endpoints? Monitoring

Answer:

Q8 What are the common performance bottlenecks in Distributed Databases and how do you address them? Compliance

Answer:

Q9 What security best practices should you follow when deploying Distributed Databases? Pen-Testing

Answer:

Q10 What are the most common pitfalls or mistakes teams make when adopting Distributed Databases? Performance

Answer:
