## ENVIRONMENT

Solve the following problems. Write your answer on the line.

Score: \_\_\_\_\_ / 20

Grade 5 | Science | Sheet 3

|                                                                |                                                                         |                                                  |                                                            |
|----------------------------------------------------------------|-------------------------------------------------------------------------|--------------------------------------------------|------------------------------------------------------------|
| 1) Science is the systematic study of the natural world. _____ | 2) Hypothesis word. _____ explanation. _____                            | 3) The independent variable is _____             | 4) The dependent variable is _____ in an experiment. _____ |
| 5) A controlled variable is kept _____                         | 6) Observations should be _____                                         | 7) The conclusion is based on _____              | 8) Peer review ensures scientific _____.                   |
| 9) SI system is used for _____ measurement. _____              | 10) The cell is the basic unit of _____                                 | 11) Cells were discovered by Robert Brown. _____ | 12) DNA is found in the _____.                             |
| 13) Mitochondria is the _____ of the cell. _____               | 14) Cell membrane controls what _____ enters and leaves the cell. _____ | 15) Plant cells have a _____ wall. _____         | 16) Chloroplasts are found in _____ cells. _____           |
| 17) Nucleus controls cell _____.                               | 18) Unicellular organisms have _____                                    | 19) Multicellular organisms have _____           | 20) Bacteria are _____ organisms. _____                    |

## ANSWER KEY

### Environment -- Solutions

Grade 5 | Science | Sheet 3

|                                                                 |                                                               |                                                      |                                                              |
|-----------------------------------------------------------------|---------------------------------------------------------------|------------------------------------------------------|--------------------------------------------------------------|
| 1) Science is the systematic study of the <b>natural</b> world. | 2) A hypothesis is a <b>testable</b> explanation.             | 3) The independent variable is <b>changed</b> .      | 4) The dependent variable is <b>measured</b> .               |
| 5) A controlled variable is kept <b>constant</b> .              | 6) Observations should be <b>accurate</b> .                   | 7) The conclusion is based on <b>data/evidence</b> . | 8) Peer review ensures scientific <b>accuracy/validity</b> . |
| 9) SI system is used for <b>standard</b> measurements.          | 10) The cell is the basic unit of <b>life</b> .               | 11) Cells were discovered by Robert <b>Hooke</b> .   | 12) DNA is found in the <b>nucleus</b> .                     |
| 13) Mitochondria is the <b>powerhouse</b> of the cell.          | 14) Cell membrane controls what <b>enters/exits</b> the cell. | 15) Plant cells have a <b>cell</b> wall.             | 16) Chloroplasts are found in <b>plant</b> cells.            |
| 17) Nucleus controls cell <b>activities</b> .                   | 18) Unicellular organisms have <b>one</b> cell.               | 19) Multicellular organisms have <b>many</b> cells.  | 20) Bacteria are <b>prokaryotic</b> organisms.               |
