

Name: _____

Date: _____

LIGHT

Solve the following problems. Write your answer on the line.

Score: _____ / 20

Grade 5 | Science | Sheet 2

1) Myopia (short-sightedness) is _____.	2) Hyperopia (long-sightedness) is _____.	3) Primary colors of light are red, _____, and blue.	4) White light is a _____ of all colors.
_____	_____	_____	_____
5) Electromagnetic spectrum includes visible light, _____, and _____.	6) A photon is a particle of _____.	7) Luminescent materials glow _____.	8) Solar eclipse occurs when _____ blocks _____.
_____	_____	_____	_____
9) Umbra is the complete _____ region.	10) Penumbra is the partial _____.	11) Light travels in _____ lines.	12) Speed of light is _____ m/s (approx).
_____	_____	_____	_____
13) Reflection follows the law of _____.	14) Angle of incidence = angle of _____.	15) Refraction is bending of light _____.	16) A prism splits light into _____.
_____	_____	_____	_____
17) The colors of the visible spectrum are _____.	18) CONVERGES stands for (brings together).	19) A _____ lens diverges (spreads apart).	20) A mirror _____.
_____	_____	_____	_____

Name: _____

Date: _____

ANSWER KEY

Light -- Solutions

Grade 5 | Science | Sheet 2

1) Myopia (short-sightedness) is corrected by a _____ lens. concave	2) Hyperopia (long-sightedness) is corrected by a _____ lens. convex	3) Primary colors of light are red, green and _____. blue	4) White light is a _____ of all colors. mixture
5) Electromagnetic spectrum includes _____. UV/IR/radio waves etc.	6) Photon is a particle of _____. light	7) Luminescent materials glow _____. without heat	8) Solar eclipse occurs when _____ blocks sunlight. moon
9) Umbra is the complete _____ region of shadow. shadow/dark	10) Penumbra is the partial _____ of shadow. shadow	11) Light travels in _____ lines. straight	12) Speed of light is _____ m/s (approx). 300,000,000 / 3×10^8
13) Reflection follows the law of _____. reflection	14) Angle of incidence = angle of _____. reflection	15) Refraction is bending of light when it passes from one _____ to another. medium	16) A prism splits light into _____. spectrum/rainbow colors
17) The colors of the visible spectrum are _____. Violet Indigo Blue Green Yellow Orange Red	18) CONVERGER stands for _____ (bringing together). light	19) DIVERGER stands for _____ (spreading apart). light	20) A mirror reflects _____. light
