

Name: _____

Date: _____

ELECTRICITY

Solve the following problems. Write your answer on the line.

Score: _____ / 20

Grade 6 | Science | Sheet 1

1) Electric current is flow of ____.	2) SI unit of current is ____.	3) SI unit of resistance is ____.	4) SI unit of voltage is ____.
_____	_____	_____	_____
5) Ohm's law: $V =$ ____.	6) Good conductors have ____ resistance.	7) Insulators have ____ resistance.	8) A switch ____ or opens a circuit.
_____	_____	_____	_____
9) In series circuit, current is ____.	10) In parallel circuit, voltage is ____.	11) A fuse protects against ____.	12) Electric power = voltage x ____.
_____	_____	_____	_____
13) SI unit of power is ____.	14) SI unit of energy is ____.	15) Energy = power x ____.	16) kWh is the unit of electrical ____.
_____	_____	_____	_____
17) Electromagnet is made using ____.	18) Electric motor converts electrical energy into ____.	19) Generator converts mechanical energy into ____.	20) Short circuit has ____ resistance path.
_____	_____	_____	_____

Name: _____

Date: _____

ANSWER KEY

Electricity -- Solutions

Grade 6 | Science | Sheet 1

1) Electric current is flow of ____. electrons/charge	2) SI unit of current is ____. Ampere	3) SI unit of resistance is ____. Ohm	4) SI unit of voltage is ____. Volt
5) Ohm's law: $V =$ ____. IR	6) Good conductors have ____ resistance. low	7) Insulators have ____ resistance. high	8) A switch ____ or opens a circuit. closes
9) In series circuit, current is ____. same	10) In parallel circuit, voltage is ____. same	11) A fuse protects against ____. overload/excess current	12) Electric power = voltage x ____. current
13) SI unit of power is ____. Watt	14) SI unit of energy is ____. Joule	15) Energy = power x ____. time	16) kWh is the unit of electrical ____. energy
17) Electromagnet is made using ____. iron core/coil	18) Electric motor converts electrical energy into ____ energy. mechanical	19) Generator converts mechanical energy into ____ energy. electrical	20) Short circuit has ____ resistance path. low
