

Name: _____

Date: _____

ELECTRICITY

Solve the following problems. Write your answer on the line.

Score: _____ / 20

Grade 6 | Science | Sheet 2

1) Earthing provides safety against _____. _____	2) Dry cell produces _____. _____	3) AC stands for ____ current. _____	4) DC stands for ____ current. _____
5) Resistance of conductors increases with _____. _____	6) Rheostat is a variable _____. _____	7) Bulb converts electrical energy into _____. _____	8) Lightning rod is a conductor that protects buildings from _____. _____
9) Static electricity involves _____. _____	10) Opposite charges attract _____. _____	11) Electric current is flow of _____. _____	12) SI unit of current is _____. _____
13) SI unit of resistance is _____. _____	14) SI unit of voltage is _____. _____	15) Ohm's law: $V =$ _____. _____	16) Good conductors have ____ resistance. _____
17) Insulators have ____ resistance. _____	18) A switch ____ or opens a circuit. _____	19) In series circuit, current is _____. _____	20) In parallel circuit, voltage is _____. _____

Name: _____

Date: _____

ANSWER KEY

Electricity -- Solutions

Grade 6 | Science | Sheet 2

1) Earthing provides safety against _____. electric	2) Dry cell produces _____. DC current	3) AC stands for ____ current. alternating	4) DC stands for ____ current. direct
5) Resistance of conductors increases with _____. temperature	6) A rheostat is a variable _____. resistor	7) Bulb converts electrical energy into _____. light	8) Lightning conductor protects buildings from _____. lightning
9) Static electricity involves _____. charge	10) Charged objects attract _____. opposite charges/neutral objects	11) Electric current is flow of _____. electrons/charge	12) SI unit of current is _____. Ampere
13) SI unit of resistance is _____. Ohm	14) SI unit of voltage is _____. Volt	15) Ohm's law: $V =$ _____. IR	16) Good conductors have ____ resistance. low
17) Insulators have ____ resistance. high	18) A switch ____ or opens a circuit. closes	19) In series circuit, current is _____. same	20) In parallel circuit, voltage is _____. same
