

Name: _____

Date: _____

LIGHT

Solve the following problems. Write your answer on the line.

Score: _____ / 20

Grade 7 | Science | Sheet 3

1) Plane mirror forms a ____ image.	2) Virtual image cannot be formed on a screen.	3) Opaque objects do not allow light to pass through them.	4) Transparent objects allow light to pass through them.
_____	_____	_____	_____
5) Translucent objects allow some light to pass through them.	6) Shadows are formed when light is blocked by an opaque object.	7) Total internal reflection occurs when light travels from a denser medium to a rarer medium at an angle greater than the critical angle.	8) Optical fibers use the principle of total internal reflection.
_____	_____	_____	_____
9) Human eye has a convex lens.	10) Retina converts light into electrical signals.	11) Myopia (short-sightedness) is corrected by using a concave lens.	12) Hypermetropia (long-sightedness) is corrected by using a convex lens.
_____	_____	_____	_____
13) Primary colors of light are red, green and blue.	14) White light is a mixture of all colors.	15) Electromagnetic spectrum includes radio waves, microwaves, infrared, visible light, ultraviolet, X-rays and gamma rays.	16) A photon is a particle of light.
_____	_____	_____	_____
17) Luminescent materials glow without the need for heat.	18) Solar eclipse occurs when the Moon comes between the Sun and the Earth.	19) Umbra is the complete shadow.	20) Penumbra is the partial shadow.
_____	_____	_____	_____

ANSWER KEY

Light -- Solutions

Grade 7 | Science | Sheet 3

1) Plane mirror forms a ____ image. virtual	2) Virtual image cannot be formed on ____. screen	3) Opaque objects do not allow light to ____. pass through	4) Transparent objects allow light to ____. pass through
5) Translucent objects allow ____ light to pass through. partial	6) Shadows are formed when light is ____. blocked	7) Total internal reflection occurs when light travels from a denser medium to a rarer medium at an angle greater than the ____. critical angle	8) Optical fibres work on the principle of ____. total internal reflection
9) Human eye has a ____ lens. convex	10) Retina converts light into ____. nerve signals	11) Myopia (short-sightedness) is corrected using a ____ lens. concave	12) Hyperopia (long-sightedness) is corrected using a ____ lens. convex
13) Primary colors of light are red, green and ____. blue	14) White light is a ____ of all colors. mixture	15) Electromagnetic spectrum includes ____. UV/IR/radio waves etc.	16) Shadow is formed when an object blocks the path of ____. light
17) Luminescent materials glow ____. without heat	18) Solar eclipse occurs when the ____ comes between the sun and the earth. moon	19) Umbra is the complete ____ of an object. shadow/dark	20) Penumbra is the partial ____ of an object. shadow
