

Name: _____

Date: _____

MOTION AND TIME

Solve the following problems. Write your answer on the line.

Score: _____ / 20

Grade 7 | Science | Sheet 4

1) Distance-time graph slope = _____	2) Uniform motion has constant _____	3) Non-uniform motion has changing _____	4) A spring balance measures ____.
5) A beam balance measures _____	6) Magnetic force is a _____ force.	7) Electrostatic force is a _____ force.	8) Friction can be reduced by ____.
9) Terminal velocity is reached when drag equals ____.	10) Work = force x ____.	11) Power = work / ____.	12) SI unit of energy is ____.
13) Kinetic energy is energy of ____.	14) Potential energy is energy of ____.	15) $KE = 0.5 \times \text{mass} \times \text{_____}$	16) Conservation of energy: energy can ____.
17) Momentum = mass x ____.	18) Impulse = force x ____.	19) Rolling friction is _____ than sliding friction.	20) Drag is a type of friction in ____.

Name: _____

Date: _____

ANSWER KEY

Motion and Time -- Solutions

Grade 7 | Science | Sheet 4

1) Distance-time graph slope = speed	2) Uniform motion has constant speed/velocity	3) Non-uniform motion has changing speed	4) A spring balance measures _____. weight
5) A beam balance measures _____. mass	6) Magnetic force is a ____ force. non-contact	7) Electrostatic force is a ____ force. non-contact	8) Friction can be reduced by _____. lubrication
9) Terminal velocity is reached when weight equals _____. weight	10) Work equals force x _____. distance	11) Power = work / _____. time	12) SI unit of energy is _____. Joule
13) Kinetic energy is energy of _____. motion	14) Potential energy is energy of _____. position	15) $KE = 0.5 \times \text{mass} \times \text{_____}$. velocity squared	16) Conservation of energy: energy cannot be _____. created
17) Momentum = mass x _____. velocity	18) Impulse = force x _____. time	19) Rolling friction is ____ than sliding friction. less	20) Drag is friction in _____. fluids/air/water
