

Name: _____

Date: _____

SOUND

Solve the following problems. Write your answer on the line.

Score: _____ / 20

Grade 8 | Science | Sheet 2

1) A tuning fork produces a _____	2) Wavelength is distance between _____	3) Speed = frequency x _____	4) Bats use _____ for navigation.
_____	_____	_____	_____
5) Sonic boom occurs when object moves _____ of sound.	6) Resonance occurs when vibrations _____	7) Sound energy frequency converts _____	8) Microphone converts sound to _____.
_____	_____	_____	_____
9) Speaker converts electrical signal to _____	10) Decibel (dB) scale is _____ (geometric)	11) Sound travels a _____ to travel _____	12) Sound cannot travel through _____.
_____	_____	_____	_____
13) Sound travels fastest in _____	14) Frequency of sound is measured in _____	15) High frequency sound has _____	16) Amplitude determines _____ of sound
_____	_____	_____	_____
17) Loudness is measured in _____	18) Echo is _____ of sound.	19) Ultrasound has frequency above _____	20) Infrasound has frequency below _____
_____	_____	_____	_____

Name: _____

Date: _____

ANSWER KEY

Sound -- Solutions

Grade 8 | Science | Sheet 2

1) A tuning fork produces a ____ note. pure/single	2) Wavelength is distance between _____. compressions/rarefactions	3) Speed = frequency x _____. wavelength	4) Bats use ____ for navigation. echolocation
5) Sonic boom occurs when object moves _____. speed	6) Resonance of sound occurs when vibrations _____. natural	7) Sound energy frequency converted to _____. electrical	8) Microphone converts sound to _____. electrical signals
9) Speaker converts electrical signals to _____. sound	10) Decibel (dB) scale is ____ (geometric). logarithmic	11) Sound travels a ____ to travel. medium	12) Sound cannot travel through _____. vacuum
13) Sound travels fastest in _____. solids	14) Frequency of sound is measured in _____. Hertz	15) High frequency sound has _____. high	16) Amplitude determines ____ of sound. loudness
17) Loudness is measured in _____. decibels	18) Echo is ____ of sound. reflection	19) Ultrasound has frequency above _____. 20,000	20) Infrasound has frequency below _____. 20
