FORCE AND MOTION

Solve the following problems. Write your answer on the line.

Score: _____ / 20 Sheet 1 of 4

1) Non-uniform motion has changing ____. _____	2) Gravity pulls objects ____. _____
3) Magnetic force is a ____ force. _____	4) Electrostatic force is a ____ force. _____
5) Newton's 1st Law is the law of ____. _____	6) $KE = 0.5 \times \text{mass} \times$ ____. _____
7) Momentum = mass $\times$ ____. _____	8) Velocity includes speed and ____. _____
9) Uniform motion has constant ____. _____	10) Gravitational force on moon is ____ of Earth's. _____
11) Potential energy is energy of ____. _____	12) SI unit of energy is ____. _____
13) A smooth surface has ____ friction. _____	14) Impulse = force $\times$ ____. _____
15) Kinetic energy is energy of ____. _____	16) Speed = distance / ____. _____
17) Friction opposes ____. _____	18) Archimedes' principle relates to ____. _____
19) A spring balance measures ____. _____	20) Friction can be reduced by ____. _____
