FORCE AND MOTION

Solve the following problems. Write your answer on the line.

Score: _____ / 20 Sheet 3 of 4

1) SI unit of weight is ____.	2) Newton's 2nd Law: $F =$ ____.
3) Weight = mass x ____.	4) SI unit of force is ____.
5) Archimedes' principle relates to ____.	6) Friction creates ____.
7) $KE = 0.5 \times \text{mass} \times$ ____.	8) Uniform motion has constant ____.
9) Force can change the ____ of an object.	10) A body floats if its density is less than ____.
11) Potential energy is energy of ____.	12) Electrostatic force is a ____ force.
13) Impulse = force x ____.	14) A smooth surface has ____ friction.
15) A beam balance measures ____.	16) Pressure = force / ____.
17) Magnetic force is a ____ force.	18) Work = force x ____.
19) Drag is friction in ____.	20) Distance-time graph slope = ____.
