

Name: _____ Class/Sec: _____ Roll No: _____ Date: _____

ELECTRICITY

Solve the following problems. Write your answer on the line.

Score: _____ / 20 Sheet 1 of 4

1) In parallel circuit, voltage is ____ everywhere. _____	2) Electric power = voltage x ____. _____
3) Electric current is flow of ____. _____	4) Electromagnet is made using current and ____. _____
5) SI unit of energy is ____. _____	6) kWh is the unit of electrical ____. _____
7) Good conductors have ____ resistance. _____	8) Static electricity involves ____ on surfaces. _____
9) SI unit of resistance is ____. _____	10) A rheostat is a variable ____. _____
11) SI unit of power is ____. _____	12) SI unit of voltage is ____. _____
13) Generator converts mechanical to ____ energy. _____	14) In series circuit, current is ____ everywhere. _____
15) Charged objects attract ____. _____	16) Insulators have ____ resistance. _____
17) A switch ____ or opens a circuit. _____	18) Electric motor converts electrical to ____ energy. _____
19) DC stands for ____ current. _____	20) Resistance of conductors increases with ____. _____
