

Name: _____ Class/Sec: _____ Roll No: _____ Date: _____

MAGNETS

Solve the following problems. Write your answer on the line.

Score: _____ / 20 Sheet 1 of 4

1) A fuse protects against ____.	2) SI unit of energy is ____.
3) Electric power = voltage x ____.	4) Generator converts mechanical to ____ energy.
5) Good conductors have ____ resistance.	6) Short circuit has ____ resistance path.
7) AC stands for ____ current.	8) SI unit of voltage is ____.
9) SI unit of resistance is ____.	10) Lightning conductor protects buildings from ____.
11) Static electricity involves ____ on surfaces.	12) Electric motor converts electrical to ____ energy.
13) Ohm's law: $V =$ ____.	14) Electromagnet is made using current and ____.
15) Earthing provides safety against ____ shock.	16) In series circuit, current is ____ everywhere.
17) A switch ____ or opens a circuit.	18) Resistance of conductors increases with ____.
19) SI unit of current is ____.	20) Energy = power x ____.
