

Name: _____ Class/Sec: _____ Roll No: _____ Date: _____

MAGNETS

Solve the following problems. Write your answer on the line.

Score: _____ / 20 Sheet 3 of 4

1) Ohm's law: $V = \underline{\hspace{2cm}}$. _____	2) Earthing provides safety against _____ shock. _____
3) Lightning conductor protects buildings from _____. _____	4) A rheostat is a variable _____. _____
5) DC stands for _____ current. _____	6) A switch _____ or opens a circuit. _____
7) Electric motor converts electrical to _____ energy. _____	8) A fuse protects against _____. _____
9) Resistance of conductors increases with _____. _____	10) AC stands for _____ current. _____
11) kWh is the unit of electrical _____. _____	12) SI unit of power is _____. _____
13) Electric current is flow of _____. _____	14) Bulb converts electrical energy to _____ and heat. _____
15) Energy = power x _____. _____	16) Short circuit has _____ resistance path. _____
17) Insulators have _____ resistance. _____	18) SI unit of voltage is _____. _____
19) Generator converts mechanical to _____ energy. _____	20) SI unit of energy is _____. _____
