

Name: _____ Class/Sec: _____ Roll No: _____ Date: _____

CHEMICAL EFFECTS OF ELECTRIC CURRENT

Solve the following problems. Write your answer on the line.

Score: _____ / 20 Sheet 4 of 4

1) Bulb converts electrical energy to ____ and heat. _____	2) Short circuit has ____ resistance path. _____
3) Resistance of conductors increases with ____. _____	4) Electric current is flow of ____. _____
5) Insulators have ____ resistance. _____	6) Good conductors have ____ resistance. _____
7) SI unit of resistance is ____. _____	8) Electric motor converts electrical to ____ energy. _____
9) AC stands for ____ current. _____	10) kWh is the unit of electrical ____. _____
11) A switch ____ or opens a circuit. _____	12) A fuse protects against ____. _____
13) Electromagnet is made using current and ____. _____	14) In series circuit, current is ____ everywhere. _____
15) SI unit of voltage is ____. _____	16) Ohm's law: $V =$ ____. _____
17) Electric power = voltage x ____. _____	18) DC stands for ____ current. _____
19) Charged objects attract ____. _____	20) Static electricity involves ____ on surfaces. _____
