

Name: _____ Class/Sec: _____ Roll No: _____ Date: _____

ELECTRICITY

Solve the following problems. Write your answer on the line.

Score: _____ / 20 Sheet 4 of 4

1) Energy = power x ____. _____	2) Charged objects attract ____. _____
3) SI unit of current is ____. _____	4) Generator converts mechanical to ____ energy. _____
5) Lightning conductor protects buildings from ____. _____	6) Bulb converts electrical energy to ____ and heat. _____
7) Short circuit has ____ resistance path. _____	8) Good conductors have ____ resistance. _____
9) kWh is the unit of electrical ____. _____	10) Electric current is flow of ____. _____
11) Ohm's law: $V =$ ____. _____	12) Electric motor converts electrical to ____ energy. _____
13) AC stands for ____ current. _____	14) In series circuit, current is ____ everywhere. _____
15) Electromagnet is made using current and ____. _____	16) DC stands for ____ current. _____
17) Electric power = voltage x ____. _____	18) Dry cell produces ____. _____
19) SI unit of energy is ____. _____	20) In parallel circuit, voltage is ____ everywhere. _____
