

Name: _____ Class/Sec: _____ Roll No: _____ Date: _____

FORCE AND PRESSURE

Solve the following problems. Write your answer on the line.

Score: _____ / 20 Sheet 1 of 4

1) Conservation of energy: energy cannot be ____ or des... _____	2) Buoyancy is the ____ force on an object in fluid. _____
3) A spring balance measures ____. _____	4) Archimedes' principle relates to ____. _____
5) Potential energy is energy of ____. _____	6) Pressure = force / ____. _____
7) A beam balance measures ____. _____	8) Newton's 1st Law is the law of ____. _____
9) Friction creates ____. _____	10) $KE = 0.5 \times \text{mass} \times \text{____}$. _____
11) Electrostatic force is a ____ force. _____	12) Power = work / ____. _____
13) Terminal velocity is reached when drag equals ____. _____	14) Non-uniform motion has changing ____. _____
15) Acceleration = change in velocity / ____. _____	16) Impulse = force $\times$ ____. _____
17) SI unit of mass is ____. _____	18) Gravity pulls objects ____. _____
19) Momentum = mass $\times$ ____. _____	20) Kinetic energy is energy of ____. _____
