## FORCE AND PRESSURE

Solve the following problems. Write your answer on the line.

Score: \_\_\_\_\_ / 20 Sheet 3 of 4

|                                                             |                                                               |
|-------------------------------------------------------------|---------------------------------------------------------------|
| 1) Pressure = force / ____.<br>_____                        | 2) A smooth surface has ____ friction.<br>_____               |
| 3) Gravitational force on moon is ____ of Earth's.<br>_____ | 4) Buoyancy is the ____ force on an object in fluid.<br>_____ |
| 5) Work = force x ____.<br>_____                            | 6) Newton's 1st Law is the law of ____.<br>_____              |
| 7) Archimedes' principle relates to ____.<br>_____          | 8) Potential energy is energy of ____.<br>_____               |
| 9) Speed = distance / ____.<br>_____                        | 10) SI unit of weight is ____.<br>_____                       |
| 11) Impulse = force x ____.<br>_____                        | 12) Momentum = mass x ____.<br>_____                          |
| 13) KE = $0.5 \times \text{mass} \times$ ____.<br>_____     | 14) SI unit of force is ____.<br>_____                        |
| 15) Gravity pulls objects ____.<br>_____                    | 16) Velocity includes speed and ____.<br>_____                |
| 17) Friction creates ____.<br>_____                         | 18) Weight = mass x ____.<br>_____                            |
| 19) Kinetic energy is energy of ____.<br>_____              | 20) A spring balance measures ____.<br>_____                  |
